

PACKING PRESS

REFERENCE : MP610

Non contractual photo

SERVICE :

DIMENSIONS : 1000 X 850 X 1900 MM

WEIGHT : 180KG

The pulp is deposited and spread on a rack previously covered with a canvas and a template; everything forms a package. All the packets thus formed are pressed by means of a manual or automatic hydraulic cylinder. The yield is between 50 and 80% depending on the fruit.

Technical specifications :

- Force of 8 tons for a flow of 300 L / h
- Manual hydraulic cylinder
- Possibility of forming 6 packs
