

HYDRAULIC OPERATOR

Non contractual photo

SERVICE :

REFERENCE : LYRA

This case is used to study a rotary rack actuator for the transformation of linear motion into rotary motion. It is designed for intensive use of maneuvering swing gates

Technical specifications :

Proposed TP Themes :

- Verification of the technical characteristics
- Rack / body guidance modeling
- Technical Function and Functional Rating
- Seal function

Composition :

- Set of component parts of the cylinder
- Measuring instruments (calipers and ruler)
- Tools needed for handling
- 1 lot of spare parts
- 1 multimedia on tightness
- CD Rom with educational and technical resources as well as 3D drawings files
